## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1/19/2007 has been entered.

2. Prior rejection over Lin et al. is withdrawn in view of amendment.

### ***Claim Rejections - 35 USC § 112***

3. Claims 1-5, 8-13, 15, 16 and 19-25 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification as filed does not provide support for the new limitation of "a melting point of at least 165°C." Applicants state that support for this amendment may be found in the examples, which indeed include melting temperatures which are at least 165°C (i.e., Example 1 reports 168.4°C, Example 2 reports 167.7°C and Example 5 reports 168°C).

Art Unit: 1713

However, the examples described in the specification do not provide support for arbitrary selection of the value of 165°C as an endpoint of a newly claimed range.

***Double Patenting***

4. Claims 1-5, 8-13, 15, 16 and 19-25 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1 and 2 of U.S. Patent No. 7,087,680 for the reasons set forth in item 2 of the Office action mailed 8/25/2006. The additional features of the amended claims filed 1/19/2007 fail to distinguish over the reference because the pentad isotacticity and melting point are those which would inherently result by merely following the method of the reference to obtain the claimed polymer (see Table 2, Examples 1, 2 and 5). Applicants have made no substantive response to this rejection.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roberto Rábago whose telephone number is (571) 272-1109. The examiner can normally be reached on Monday - Friday from 8:00 - 4:00.
